WORK EXPERIENCE

OptimedAI (Entrepreneurship Project)

Spain - Remote

Owner, Project Director

Oct 2024 - Present

- Company specialized in artificial intelligence solutions for companies.
- We are dedicated to the creation of predictive models, process automation and development of customized technologies that optimize the efficiency and productivity of our clients.

Self-Employed | Data Analyst - [PORTFOLIO](#)

Navarra, Spain

Data Analyst - Remote

May 2025 - Present

Professional Development & Transition: From Finance to Data Analysis:

- Attended a **Master's Degree in Artificial Intelligence**, focused on data modeling and process automation.
- Graduated from a **Bootcamp in Data Analytics**, focused on real applications and best practices in data analytics.
- Completed a **Professional Certification in Data Analytics**, consolidating my expertise in key technologies and advanced methodologies.
- Training **Official Data Analytics Certifications**: Tableau Certification, PL-300 Certification & Qlik Sense Certification.

Technical Skills:

Data Cleansing, Data Management & Analytics:

- Python (NumPy, Pandas, Matplotlib, Seaborn): Efficient processing, cleaning and visualization of large volumes of data.
- SQL: Query optimization and structured database management.
- JupyterLab, Google Colab: Interactive environments for data manipulation.

Data Modeling & ETL Processes:

- SQL: Database design, information structuring and relational data modeling.
- Python (JSON, Pandas): ETL process execution and data transformation.

Reporting & Visualization tools:

- Power BI, Tableau, Qlik Sense: Creating dynamic dashboards for data-driven decision making.
- Python (Matplotlib, Seaborn): Custom visualizations for exploratory data analysis.
- SQL: Data extraction and transformation for dynamic reporting solutions.
